TURN-KEY UNMANNED FACILITIES

Unmanned Aerial Facilities by ICON (iconUAF) are to be located at Grand Sky, America's first commercial UAS business and aviation park. The projects will feature turn-key, build to suit hangar, office, shop, and lab space to meet the needs of UAS supporting companies.

iconUAF is currently leasing two buildings. UAF-GS1 has direct runway access, high-bay shops, and office suites available. UAF-GS5 is located off the tarmac, but has access to the flight line via a secure access gate. Both facilities will feature full security with gate access, fiber optic network, and flexible infrastructure services.

IconUAF is your home for development, testing, training, research, and operations for the unmanned aircraft industry.
